

YOUR TEAM IS NEVER TRULY ALONE IN THE FIELD.

One tap sends your field worker's exact location and a call for help to the right people — instantly. Silent. Real-time. Built for people who work alone.

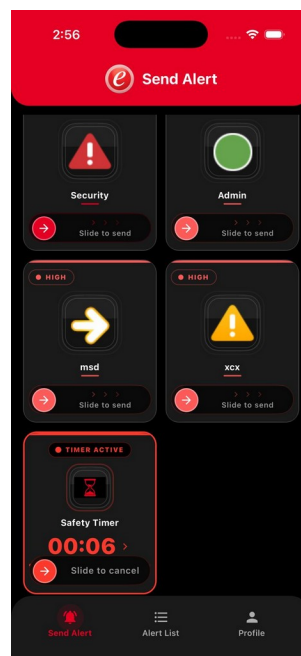

ALERTS REACH THE RIGHT PEOPLE — INSTANTLY

Every alert can go out as any combination of **email, SMS text, push notification, and desktop pop-up** — all at once, the moment the alert is sent. You decide which channels each responder gets, so no one misses a real emergency because they were on the wrong device.

 Email	 SMS Text	 Push Notification	 Desktop Pop-Up
--	---	--	---

HOW IT WORKS

1 Tap the button	2 Alert fires instantly, every channel	3 Your team responds	4 Alert is logged
-------------------------	---	-----------------------------	--------------------------

The Send Alert screen

One-Tap Panic Alert

One tap sends an instant, multi-channel alert with the worker's live location.

Real-Time GPS

Know exactly where a team member is the moment they need help.

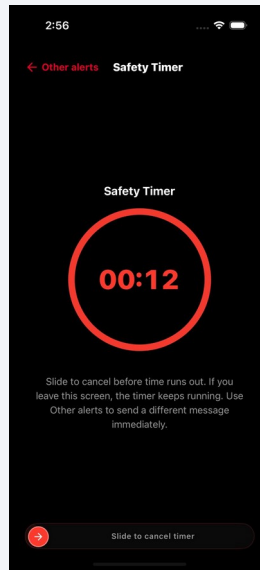

Silent & Discreet

Alerts trigger with no sound or visible change — invisible to anyone nearby.

SAFETY TIMER

Before walking into a situation with unknown risk, your worker sets a Safety Timer. If they finish safely, they check in or cancel it themselves.

If the timer runs out with no check-in, an alert fires automatically to your safety team with their last known location — no action required from the worker.

EXAMPLE: A home health aide arrives for a first-time visit to a new patient's house. She sets a 45-minute Safety Timer before going in. If 45 minutes pass with no check-in, her supervisor is alerted immediately with her location — no call, text, or extra step needed from her.

EPANICBUTTON BY THE NUMBERS (2018-JULY 2026)

52,562 Total Incidents Logged	13,845 Serious Incidents	544 911 Dispatches	126 Private Security Dispatched
---	------------------------------------	------------------------------	---

“One of our nurses at the nursing station faced an irate patient who was carrying a knife. She sent an ePanic Button alert. The nurses received the help they needed and all responders who were supposed to be there arrived quickly. No one was hurt. The nurse was quite happy with the system! ePanic Button worked perfectly.

— Bob Ross, Brockton Neighborhood Health Center
